```
|    ..+=o   .oo  |
+----[SHA256]-----+
```

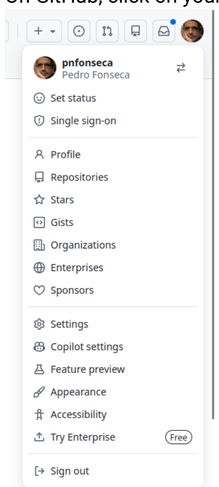

In the `.ssh` folder under your home folder, two files with the same base name appear, one of which has the `.pub` extension:

```
$ cd
$ cd .ssh
$ ls -l
total 16
-rw------- 1 pf_ua_pt pf_ua_pt 432 Sep  5 16:50 id_ed25519
-rw-r--r-- 1 pf_ua_pt pf_ua_pt 114 Sep  5 16:50 id_ed25519.pub
-rw------- 1 pf_ua_pt pf_ua_pt 978 Sep  5 16:03 known_hosts
```

The file with the `.pub` extension contains the public key. This key has to be registered on GitHub.

Registering the key on GitHub

On GitHub, click on your photo or user icon (top right corner) to open the options menu. In that menu, select the "Settings" option:

On the "Settings" page (https://github.com/settings/profile), select the "SSH and GPG keys" option in the left-hand menu:
